

The Information Ecosystem Bibliography

Much excellent writing has recently been published on the challenges and perils of the information ecosystem from an unusually diverse crew of authors from academia, business, federal agencies, foundation and non-profit organizations, and similar groups. New and groundbreaking pieces are being issued daily. Keeping up can be a full-time job. Below are a few of the better writings on the information ecosystem, particularly pieces on electronic records preservation, intellectual property rights, information technology, and management of information including archives, electronic records, and paper.
